

# Syntphony Compliance Management

We streamline complex certification procedures, minimising errors, reducing operational risks, and accelerating time-to-market through guided, data-oriented workflows, enabling seamless regulatory approvals and secure communications with global authorities.

syntphony

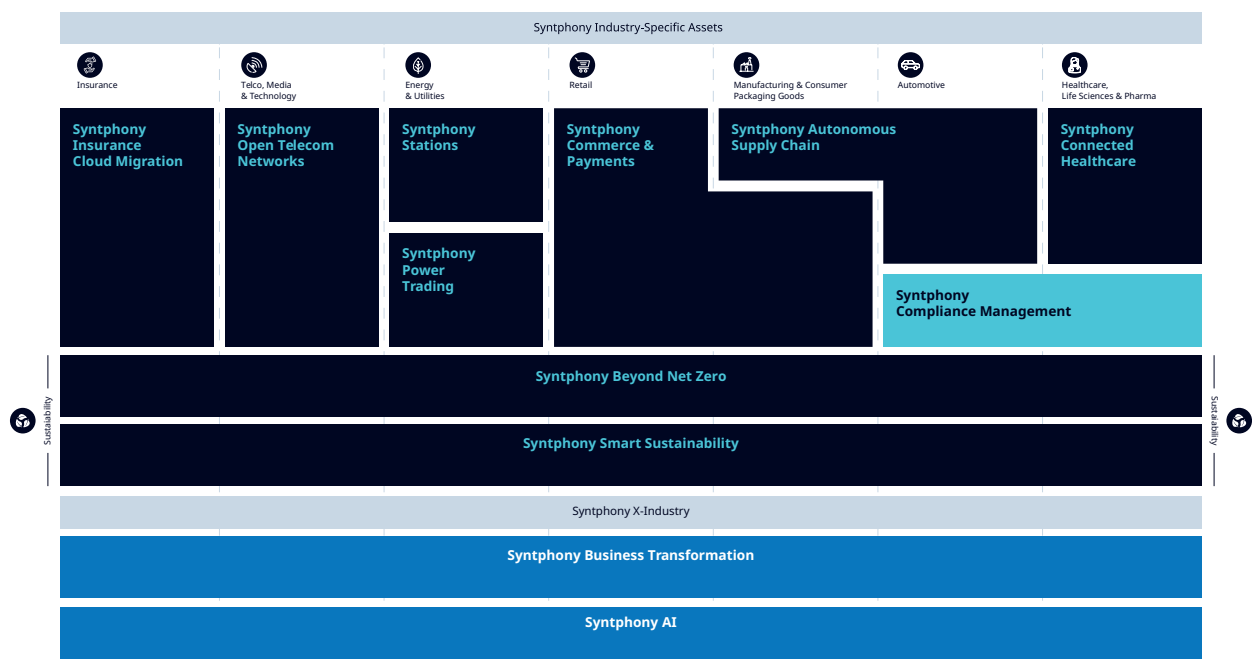

# We develop products and solutions that are in tune with businesses

Syntphony is the composable platform of digital products and solutions from NTT DATA, created to help global organisations accelerate innovation, align business strategy with technology, and scale transformation initiatives with speed and efficiency.

Designed for enterprises that demand flexibility, modularity and integration, Syntphony offers a portfolio of ready-to-deploy, enterprise-grade digital products developed by NTT DATA's global talent network. By combining business consulting expertise, proprietary technologies and industry knowledge, the Syntphony ecosystem multiplies the value for clients, reducing time to market and unlocking synergies across multiple domains.

**Syntphony is the most valuable Product Composable Platform of NTT DATA, enabling clients to orchestrate scalable, resilient, and future-ready business solutions.**

# Streamline approvals, minimise risks, accelerate market entry across global industries.

**Turn regulatory obstacles into growth drivers with seamless compliance management.**

**In today's regulated world, managing compliance is no longer optional.**

Organisations face mounting pressure to navigate global standards effectively, unlocking a multi-billion-dollar opportunity in efficiency, risk reduction and market acceleration.

Navigating regulatory overload requires structured, AI-enhanced compliance solutions. Automated workflows, intelligent document processing and risk assessment transform disjointed processes into efficient, controlled and transparent end-to-end homologation journeys across multiple industries.

As regulatory complexity grows, so does maturity in digital compliance solutions.

Much like cybersecurity's rise from optional to essential, automated compliance is evolving into a strategic pillar for global organisations.

# Empower your regulatory journey. Streamline compliance processes effortlessly.

## **Navigating complex, evolving global regulations**

All Industries, not only manufacturers and suppliers face growing pressure to comply with constantly evolving, diverse international regulations.

Manual, fragmented processes create inefficiencies, delays, and increased risks.

Businesses struggle to manage regulatory requirements, data, and submissions effectively, impacting market entry, profitability, and competitiveness in highly regulated industries such as automotive, pharma, and life sciences.

## **Driving efficient, connected regulatory processes**

Our cloud-native, AI-driven platform transforms compliance management into an agile, efficient, and controlled process.

With integrated applications, traceable workflows, and seamless document management, we ensure businesses reduce complexity, improve decision-making, and enhance collaboration, supporting corporate risk management and internal audits aligned with relevant standards, enabling clients to anticipate regulatory changes confidently and drive innovation without disruption.

## **Accelerating compliance, reducing risks globally**

For manufacturers, suppliers, and authorities needing to manage complex certification, homologation, and registration processes globally, our cloud-based compliance platform streamlines approvals, ensures traceable requirements, and integrates regulatory demands into digitised workflows. Unlike rigid GRC systems, our modular, AI-supported solution accelerates compliance, reduces risks, and empowers clients with the confidence and peace of mind to manage regulatory documents efficiently, enabling faster market entry.

## **Flexible compliance, tailored to industries' demands**

We go beyond basic GRC tools by offering a scalable, AI-enhanced compliance platform designed to evolve with client needs.

Our approach ensures processes remain aligned to industry-specific regulations while fostering digital transformation.

With deep regulatory expertise, we partner with our clients to simplify complexity, driving faster decision-making and enabling their teams to focus confidently on innovation.

# Tailored Excellence: Streamlined solutions for homologation and registration challenges

**Streamlining homologation and registration with data-driven workflows.**

**Syntphony Compliance Management supports manufacturers, their suppliers, technical services and authorities in the homologation and registration process of products for global markets.**

Data-oriented, role-based workflows support the entire homologation process, including communication with authorities – from legal requirements to the end of production.

- **Standardized, modular and holistic approach dedicated to Homologation Certification.** Addressing key weak spots across the industry. Enabling consistent information flow from vehicle manufacturer to authorities.
- **SaaS cloud-based solution** (digital asset business & services, not available on market today)
- **Realizing expansion** - & feature requests by upcoming new regulations
- **Easily adoptable** – client specific attributes, workflows, status models can be adjusted

## Future-proofing compliance with composable,scalable platform ensuring business agility.

### Benefits

#### Unified Compliance Platform

Seamlessly connects certification and regulatory business objects, enabling traceable, controlled processes and full visibility across compliance tasks.

#### No Redundant Data Entry

Manages data validity across product types, avoiding duplicated entries and improving efficiency throughout the certification lifecycle.

#### Custom Product Management

Supports multiple product configurations with tailored data types, offering flexibility to manage diverse portfolios confidently.

#### Low IT Effort, Managed Service

Minimises IT workload with cloud-based managed services, ensuring secure, hassle-free compliance operations and peace of mind.

#### Automated Document Generation

Generates certification documents automatically, using technical data aligned with regulations, saving time and ensuring compliance accuracy.

#### Regulatory Updates

Keeps teams informed with latest regulations, document templates and formats, ensuring ongoing compliance without manual tracking.

#### Integrated System Connections

Facilitates data exchange and collaboration by integrating seamlessly with legacy and external systems, ensuring agile compliance processes.

#### Team Collaboration Enablement

Fosters seamless internal collaboration on compliance projects, keeping all stakeholders aligned within their familiar workflows.

### Features

#### Modular AI-Driven Platform

Cloud-native platform combining AI/GenAI for document management, workflows, data ingestion, extraction, messaging, and multilingual data management.

#### Compliance Mgmt. Apps Suite

Apps supporting work orchestration, approval data management, product registration, legal requirement and risk management, audits, and assessments.

#### Approval Data Management

Manages complex data for certification applications, automates approval document generation, and supports submission to authorities.

#### Legal Document Text Processing

Extracts and transforms regulatory texts using document intelligence, enabling seamless legal requirement management.

#### Adaptable Business Object Model

Customisable business object model with flexible roles, policies, UI configurations, and low-code scripting capabilities.

#### Work Orchestration Module

Organises compliance projects, schedules tasks, links objects, ensuring visibility and control across certification journeys.

#### Product Registration Automation

Generates and validates product data records, creates Certificates of Conformity, and registers products with authorities.

#### Risk, Audits & Assessments

Supports risk management, internal audits, gap analyses, evidence tracking, ensuring robust GRC processes linked to compliance.

## Regulation Management

In today's dynamic regulatory landscape, staying compliant can be a daunting task. With Syntphony Compliance Management, we offer a comprehensive solution.

Our AI-driven platform provides advanced analysis of regulations, deducing requirements swiftly and accurately.

This translates into easy and efficient transparency for regulations, saving up to 40-60% of research and handling time.

## Certification / Homologation Process

Navigating the complex process of homologation or product certification demands efficiency and accuracy.

Syntphony Compliance Management streamlines this journey with its automated generation of type approval documents in various formats.

By enabling one-time data input with multiple reuse on a single database, our solution reduces effort by 25%-50%, ensuring a smoother certification process.

## Registration & vehicle docs / Registration of products

Submitting product-specific characteristics to regulatory bodies or authorities requires meticulous attention to detail. With Syntphony Compliance Management, this task becomes seamless. Our platform automatically generates Certificate of Conformity (CoC) documents and statutory plates, eliminating redundant data input and enabling automatic ingest from ERP systems. This results in potential savings of 25%-80% in effort for data input and changes.

## Risk mitigation / Work Orchestration

Effective risk management is paramount in today's business landscape.

Syntphony Compliance Management offers integrated homologation project management, complete with dashboards for transparent scheduling.

By reducing schedule and rework efforts by approximately 30%, our solution ensures deadline compliance and enhances overall operational efficiency.

## Prove of conformity / Summary

Demonstrating conformity is crucial for regulatory compliance. With Syntphony Compliance Management, this process is digitized and streamlined.

Our platform provides full traceability from regulations down to delivery documents, ensuring compliance at every step.

With potential savings of over 25% in increased efficiency, our solution is a game-changer in the realm of regulatory compliance.

## About NTTDATA

---

NTT DATA - a part of NTT Group - is a trusted global innovator of IT and business services headquartered in Tokyo. We help clients transform through consulting, industry solutions, business process services, IT modernization and managed services. NTT DATA enables clients, as well as society, to move confidently into the digital future. We are committed to our clients' long-term success and combine global reach with local client attention to serve them in over 50 countries.
