Why syntphony ?

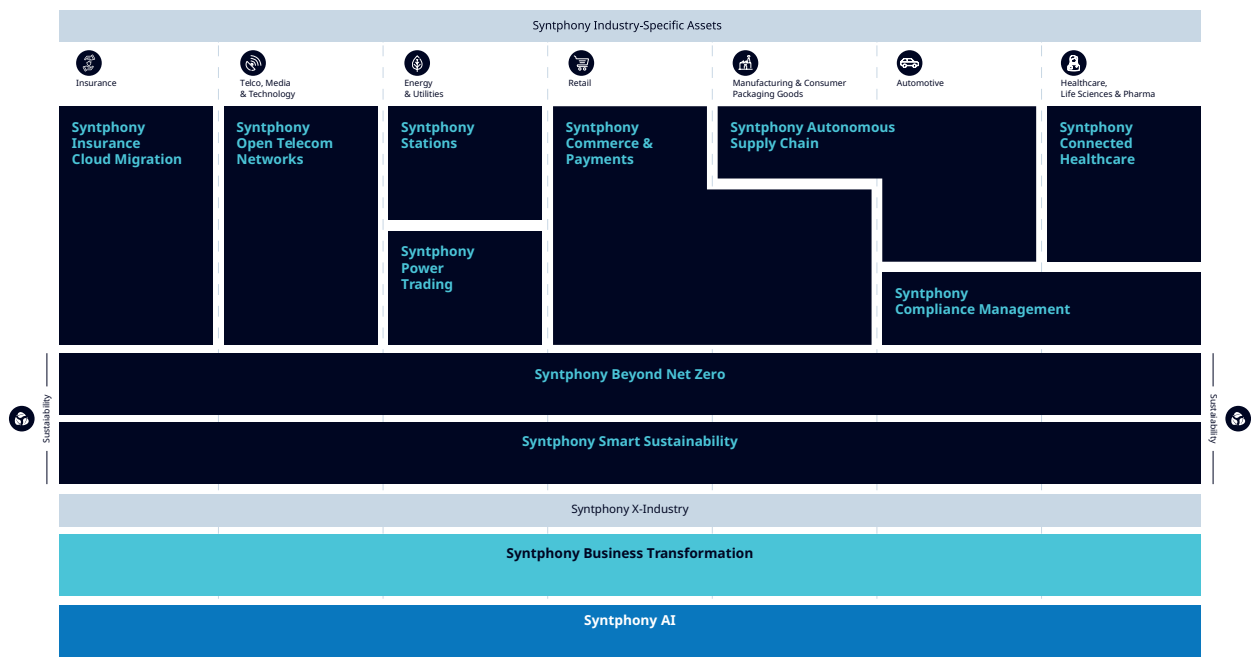

We develop products and solutions that are in tune with businesses

Syntphony is the composable platform of digital products and solutions from NTT DATA, created to help global organisations accelerate innovation, align business strategy with technology, and scale transformation initiatives with speed and efficiency.

Designed for enterprises that demand flexibility, modularity and integration, Syntphony offers a portfolio of ready-to-deploy, enterprise-grade digital products developed by NTT DATA's global talent network. By combining business consulting expertise, proprietary technologies and industry knowledge, the Syntphony ecosystem multiplies the value for clients, reducing time to market and unlocking synergies across multiple domains.

Syntphony is the most valuable Product Composable Platform of NTT DATA, enabling clients to orchestrate scalable, resilient, and future-ready business solutions.

Syntphony Business Transformation

We offer a cloud-native, modular platform that enables organisations to optimise operations, increase productivity and deliver tailored solutions with seamless integration of out-of-the-box capabilities across every industry and facilitates technology adoption with immersive learning.

NTT Data cloud-native assets and components that drive digital transformation by seamlessly integrating automation, employee engagement and industry-specific solutions.

Intelligent Automation

Deliver secure, omnichannel payment experiences with total control and flexibility, streamlining operations, reducing time to market and enabling businesses to create new customer value across every payment method and channel.

Employee Communications

We create digital workplaces that boost collaboration and employee engagement, integrating seamlessly with Microsoft 365 to personalise access, simplify governance and increase adoption across all teams and business units.

Learning Tech

We deliver adaptive learning experiences through a modular LMS, enabling fast, flexible corporate training while integrating seamlessly with business ecosystems and offering end-to-end support, content and strategy development.

Immersive Experiences

We enable companies to design immersive, shared and customisable VR scenarios that boost employee training, customer engagement and business integration through a scalable low-code platform.

Industry Cloud

We accelerate sector-specific transformation through cloud-native, prebuilt components—bringing agility, composability and control to regulated industries where customisation, compliance and scalability are essential to competitive growth.

From Fragmentation to Connection: The New Era of Internal Communication

In today's fast-paced digital landscape, internal communication has become increasingly challenging. Research shows that 44% of employees face delays or errors in their projects due to poor internal communication.

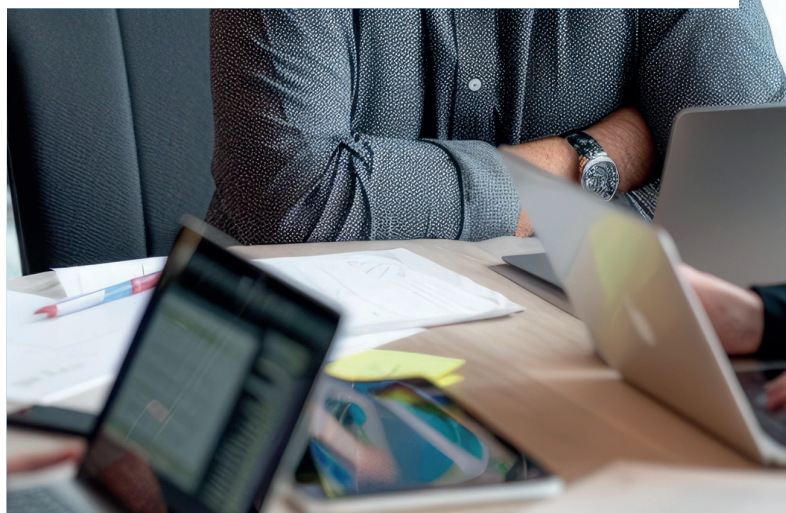

Additionally, **85% of employees feel more motivated** when regularly updated with relevant company news. Inefficient communication leads to critical delays, costing organizations an estimated \$63 million annually in lost productivity.

Our clients face several challenges:

- From an employee's perspective, communication is often excessive and fragmented, leading to a lack of camaraderie and difficulty finding essential documents.
- From the company's viewpoint, there's a lack of insight into employees' preferences and no centralized platform to manage all communication. Security concerns and tool limitations further compound the issue.

Enter Syntphony Employee Communications, a digital workspace designed to enhance the employee experience and maximize productivity within the Microsoft 365 environment. It serves as a hub for seamless communication and collaboration, addressing the challenges of fragmented communication, document management, and security concerns.
